Demographic trends in Rural NY

Jan Vink
Cornell Program on Applied Demographics
July 21, 2017
The Cornell Program on Applied Demographics (PAD) brings skills in demographics, economics, statistics, data gathering and data analysis together to provide a variety of organizations with data, information and advice.

**PAD:**

- Is a coordinating agency within the New York State Data Center (at NYS-DOL)
  - Works closely with the Governor’s Office and Office of Information Technology Services and others in preparation for a successful Census 2020
- Closely connected to the New York Federal Statistical Research Data Center
- Maintains a website with a wealth of data on counties and school districts. It also publishes county profiles and other reports.

- 24.0 - 28.9 [1]
Overall Rankings in Health Outcomes

The overall rankings in health outcomes represent how healthy counties are within the state. The healthiest county in the state is ranked #1. The ranks are based on two types of measures: how long people live and how healthy people feel while alive.

Overall Rankings in Health Factors

The overall rankings in health factors represent what influences the health of a county. They are an estimate of the future health of counties as compared to other counties within a state.

The ranks are based on four types of measures:

- health behaviors,
- clinical care,
- social and economic,
- and physical environment factors.
